Easy Label

Introduction

- This website will help users to purchase printed labels online. User can choose different shapes from the website. On the basis of that shapes, User have to fill the Height and Width of the Label. User can give height and width of the labels according to his requirements. After the User have to fill the quantity of a labels.
- User have 3 options to select design of label. User can upload design of a label or He can give Suggestion of design to our Design expert or He can send Design later.
- User have to submit his details for delivery of labels. After order confirmation user get the message of order delivery.

Scope of the System

- Online label ordering for customers
- Uploading and validating artwork files
- Displaying artwork requirements and guidelines
- Price calculation based on size, quantity, and material
- Secure order placement and confirmation
- Admin-side order management and status updates
- Customer communication through contact and artwork checker forms

Modules of the System

3.1 User Module

- User visits homepage
- Views label options, features, and process
- Selects label shape, size, quantity, and material
- Uploads artwork
- Places order and receives confirmation

3.2 Artwork Checker Module

- User submits artwork for review
- Uploads files with contact details
- Admin reviews artwork and provides feedback

3.3 Artwork Requirements Module

- Displays design guidelines
- Explains bleed, file format, export steps
- Helps users prepare correct artwork

3.4 Order Management Module

- Generates order ID
- Stores customer and order details

3.5 Admin Module

- Secure admin login
- View all orders
- View order details
- Manage customer submissions

3.6 Contact Module

- Allows users to send inquiries
- Stores messages for admin review

Tools and Technologies

Frontend:

- HTML5
- CSS3
- JavaScript
- Bootstrap

Backend:

- PHP
- Database:
- MySQL
- Server:
- Apache (XAMPP/WAMP)

System Analysis (Needs of the System)

5.1 User Needs

- Easy label ordering process
- Clear artwork guidelines
- Simple artwork upload
- Order confirmation and transparency

5.2 Business Needs

- Reduce manual order handling
- Centralized order management
- Accurate order and artwork tracking
- Improved customer communication

5.3 Technical Needs

- Secure database for storing orders
- Reliable file upload mechanism
- Admin dashboard for control
- Scalable architecture for future enhancement

Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was popularised in the 1960s with the release of Letraset sheets containing Lorem Ipsum passages, and more recently with desktop publishing software like Aldus PageMaker including versions of Lorem Ipsum. It is a long established fact that a reader will be distracted by the readable content of a page when looking at its layout. The point of using Lorem Ipsum is that it has a more-or-less normal distribution of letters, as opposed to using 'Content here, content here', making it look like readable English. Many desktop publishing packages and web page editors now use Lorem Ipsum as their default model text, and a search for 'lorem ipsum' will uncover many web sites still in their infancy.

Terms & Conditions

ARTWORK REQUIREMENTS:

The screenshot shows a web browser with three tabs: 'localhost / 127.0.0.1 / easylabel / n X', 'Easy Label', and 'localhost/easylabel/public/admin/i X | +'. The address bar shows 'localhost/easylabel/public/artwork'. The website header features the 'easylabel the label factory' logo on the left and a navigation menu on the right with links: 'HOME', 'ABOUT', 'ARTWORK REQUIREMENTS' (highlighted with a red box), 'ARTWORK CHECKER', and 'CONTACT'. The main content area has a large blue heading 'Artwork Requirements' followed by an orange subheading 'choosing design software'. The text explains that for print design, the software and file type are crucial, recommending vector-based software like Adobe Illustrator over Photoshop. It states that vector software ensures higher quality than raster-based files. It also mentions that Adobe Illustrator makes it easier for the Design Studio to manipulate artwork before printing. A 'Don't panic' note reassures users that the design studio will assist with requirements, including designing new labels or reproducing existing ones at an economical rate. Another orange subheading 'how to setup artwork' is followed by text explaining that artwork should be set up considering print and cut processes, noting that label printing allows for precision but may result in small movements, so all artwork should include bleed. A final note defines 'BLEED' as an area beyond the label edges to prevent white edges after printing.

Artwork Requirements

choosing design software

When designing for print the first question is the type of software and file type you want to use. We recommend using a Vector based software such as **Adobe Illustrator** but **Photoshop** and other software can also be used if saved correctly.

Vector software will ensure that the quality of your finished product is higher than is achievable with a raster based artwork file.

When artwork is created using Adobe illustrator it makes it easier for our Design Studio to manipulate if required before going to print.

Don't panic if your artwork doesn't meet the criteria above our design studio will be happy to assist you with all your requirements, including designing a new label or reproducing artwork at a very economical rate.

how to setup artwork

Artwork should be setup with the print and cut processes in mind. Label printing allows a great deal of precision on your artwork, however its worth bearing in mind that the process of printing and cutting your labels may result in small movement of the artwork in relation to cutters. For this reason we recommend that all artwork is supplied with bleed.

BLEED is an area that goes beyond the edges of the label size which allows for any movement on the press and guarantees that the label does not have a white edge once printed.

- ARTWORK REQUIREMENTS
- ARTWORK CHECKER
- CONTACT

how to export your artwork

The first thing to check before exporting artwork is that all **images have been embedded**. Failure to do this will mean that they will be missing when the file is opened at a later stage.

We also recommend that all **text is converted to outlines**, if this isn't done before exporting they will be missing if the new operators system doesn't have the relevant fonts installed.

Below is an example of how you should go about saving files from Adobe Illustrator.

SAVING A FILE AS AN AI or PDF FILE

- 1 Select all > Type > Create Outlines
- 2 File > Save as or File > Save a Copy
- 3 Type a filename, and choose a location for the file (desktop etc)
- 4 Choose illustrator (.ai) or (.pdf) as the file format and click Save
- 5 In the illustrator / PDF options dialog box, set the desired options and click ok

We hope you find the above information helpful.

Our Design Studio is here to help should you need assistance or Graphic Design

Please give us a call on 09558858432 and we can chat over your idea.
